Introducing the Datasol Interactive Plasma Screen

The Interactive Plasma Display is ideal for all classrooms particularly special needs. Just like an interactive whiteboard it forms an ideal focus for group teaching, allowing activities to be a shared experience and can be supplied with Promethean, SMART Board or other generic IWB software.

The Display has a clear, bright image that is not affected by the user's shadow or ambient light, which also means that there is no need to black out the room when using it. With no projector there is no risk to vision from staring into the light and no 'hotspot' on the screen, which is an added advantage for visually impaired pupils.

The height adjustable stand has been designed to allow easy access for wheelchairs. In fact, it is easy to adjust the height for different users while the board is in use. The mechanism is electronic and the wide adjustment range means the board can suit anyone from toddlers to tall teachers quickly and easily – and with no need to re-calibrate the screen in between. The stand can also easily be moved from room to room. There is also an option of a wall mounted unit which has all of the same features but with an infrared remote control.

Features and Benefits:

Easy to Use

- ✓ Built-in PC reduces the problems associated with connecting laptops
- ✓ No distracting shadow cast by the user
- ✓ Bright, high quality image – no need to darken the room
- ✓ Trolley system is easily moved to suit the group

Accessible

- ✓ Easily height adjustable while in use with electronic controls
- ✓ Accessible for wheelchair users, young children or tall teachers
- ✓ Adjustability makes it easy to reach all areas of the screen
- ✓ Wide viewing angle – no hotspot from projector lamp
- ✓ Autistic Spectrum Disorder – No risk from looking in to a projector lamp
- ✓ Quiet – no cooling fan to distract those with hearing difficulty

Convenient

- ✓ Low lifetime cost – no consumable items like projector lamps
- ✓ No moving parts such as fans – therefore a very low failure rate
- ✓ Low maintenance – no need to keep cleaning filters
- ✓ Low ICT maintenance – with built-in PC very easy to configure

The interactive plasma screen is an ideal focus for group teaching and displays a bright and vivid picture in all classroom conditions.
