

ONELAN Digital Signage

What is Digital Signage?

Digital Signage is a phrase coined to describe the use of a Display Device driven by a Media Player to present a variety of information, entertainment or advertising (called collectively Media) to an audience who are in a position to view such a display - normally for a relatively short time. The Media Player is generally updated with new media via digital file transfer, either manually using portable memory modules or via a computer network or the Internet.

Display Devices can be:

- A large format Plasma
- A Large format LCD TV screen
- A Projector
- TFT LCD Monitor

We provide a cost effective, standalone ONELAN 'Digital Signage Solution-in-a-box'. The Net-Top-Box displays powerful communications in **high definition** using live TV or video feed, RSS, HTML and Flash content all on one screen.

A small high-speed network appliance with built-in web server allowing users to configure scheduled, zoned multi-media content for a variety of display screens.

Why choose the ONELAN Digital Signage product over other brands?

- ☑ **Over 6000 Sold** - Monthly sales continue on an upward trend.
- ☑ **Free Support** - Tech Support is available to resellers and end-users alike.
- ☑ **Free Software Updates** - We encourage our customers to stay up-to-date.
- ☑ **Linux Based** - No need to be concerned about viruses, security, reliability or software licences.
- ☑ **Easy-to-Use** - No expensive and complex training required.
- ☑ **No Recurring Fees** - The Net-Top-Box is a one-off purchase.
- ☑ **Rapid Response** - As a small but dynamic company we are able to respond quickly to customer requests.
